

BEAM V5 Online is now available for user acceptance testing.

## New Functions

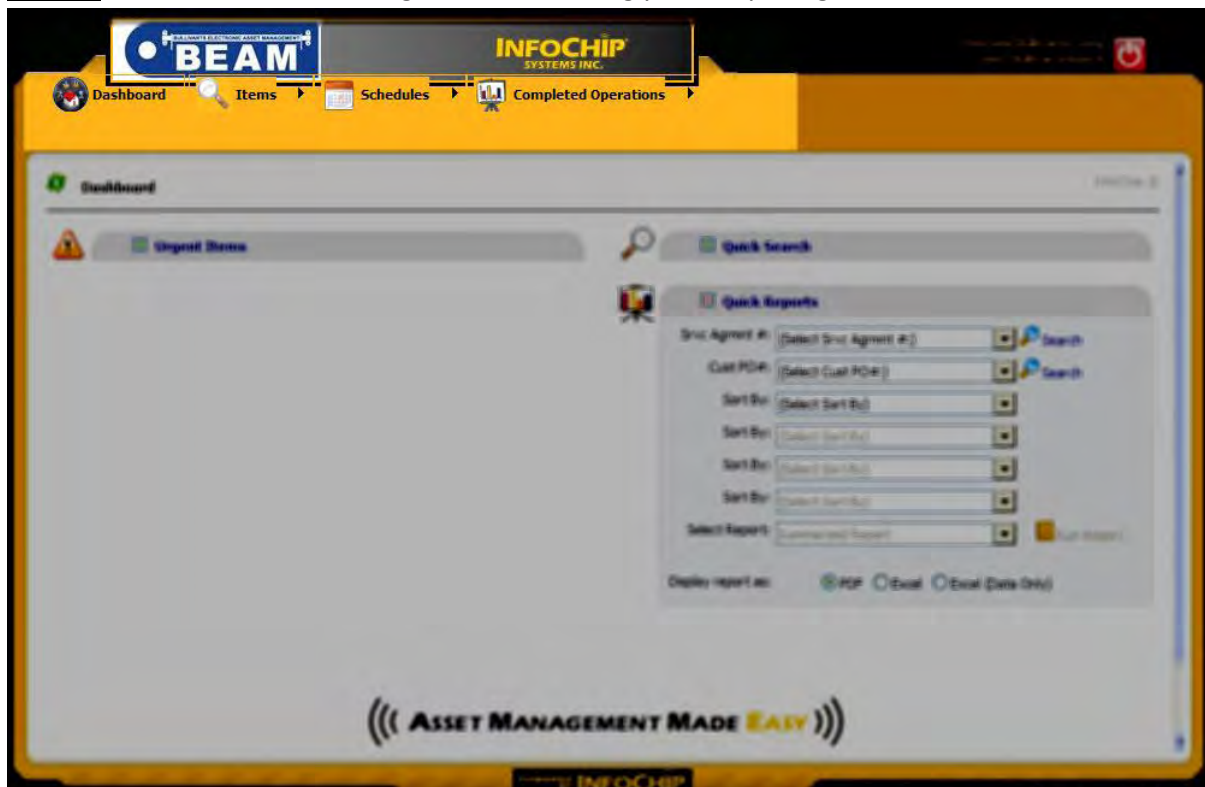

Home Page

Completely new look and feel web interface,

- ✓ Regardless of what area your in data is presented in the same window

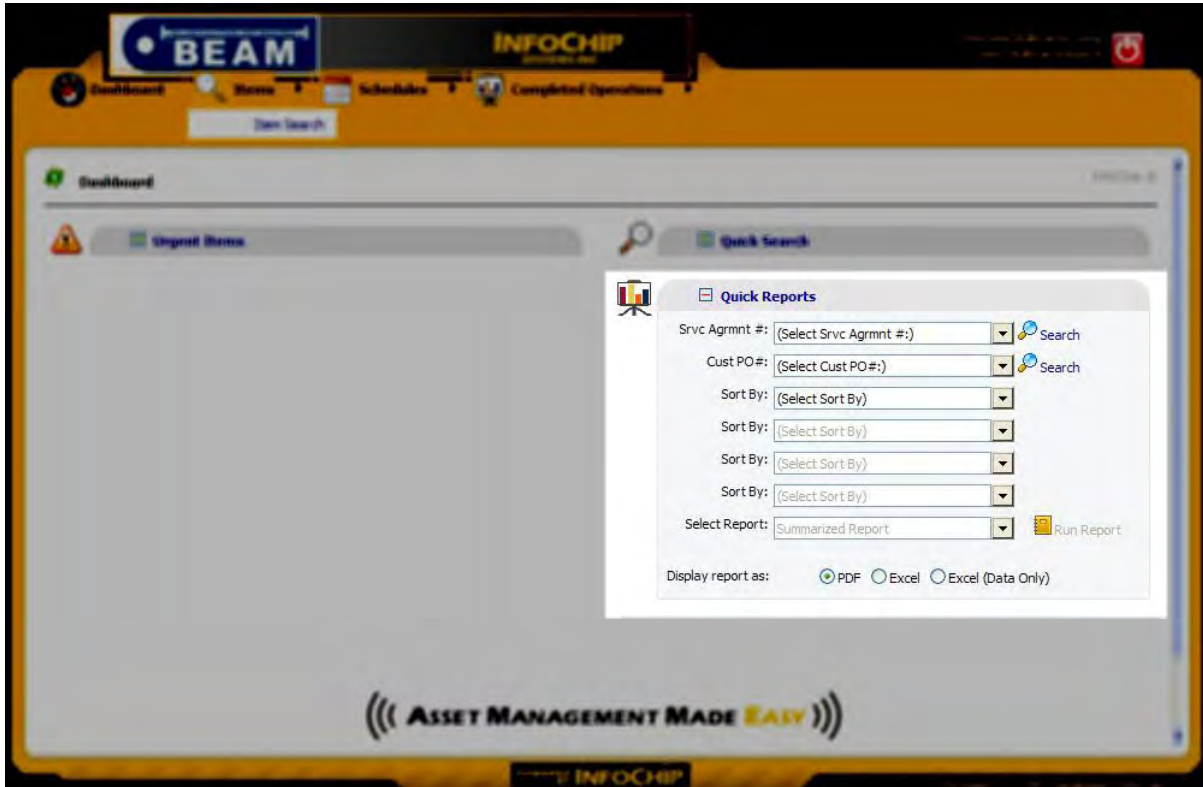

**MENU:** New: menu navigation bar, allowing you easily navigate between areas

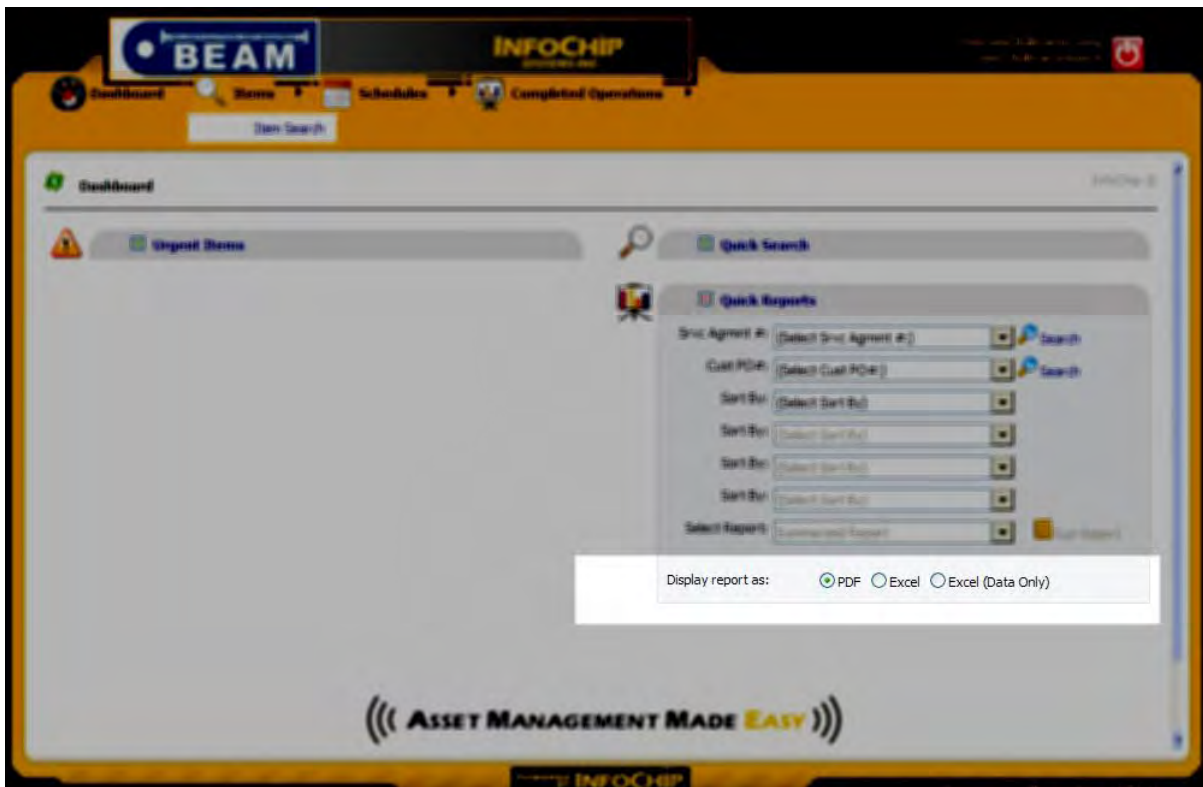

New: Dashboard feature

- ✓ easy search feature
- ✓ quick reports generator

The new quick report provides pie chart summary and the report is grouped by Inspection results.

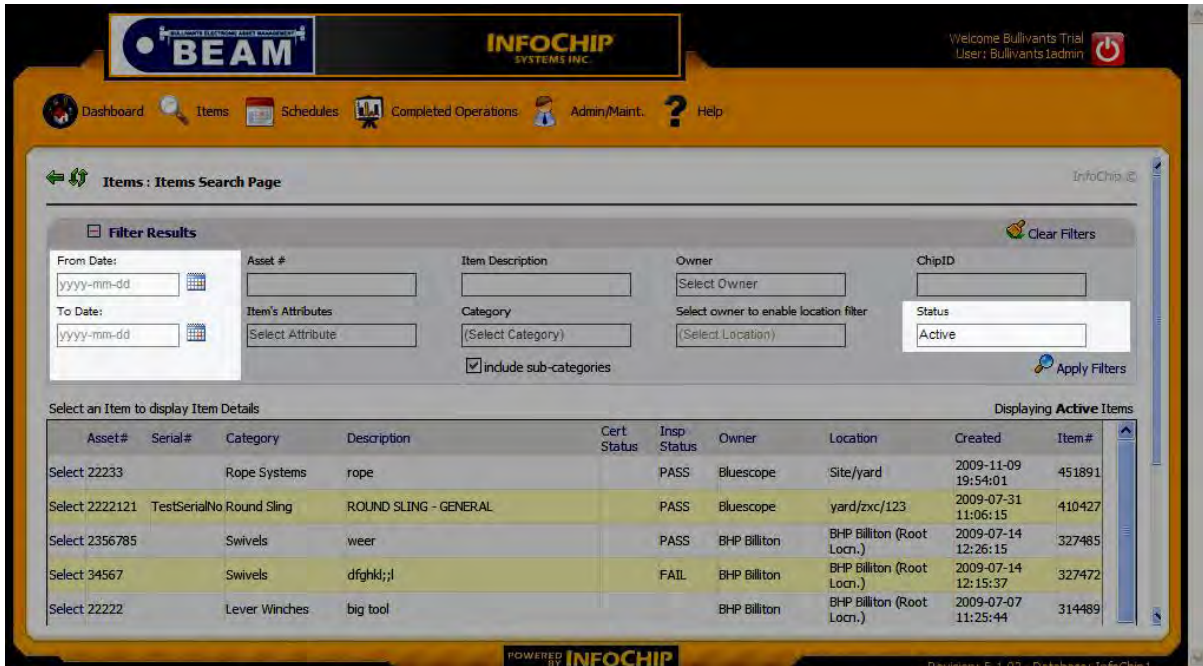

New export Report formats

**ITEMS:**

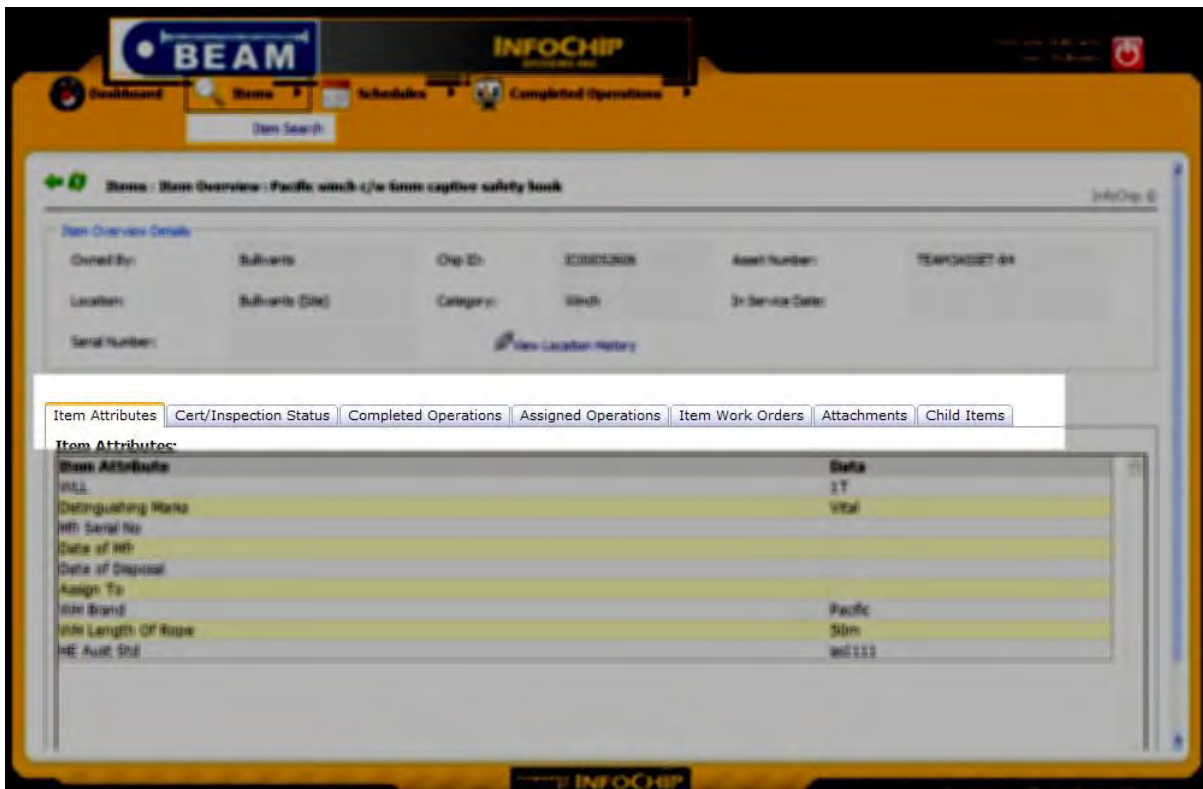

Items Search

- ✓ New: Date From Date To search option
- ✓ New: Status search i.e. Active, Out of Service, Scaped or Deleted

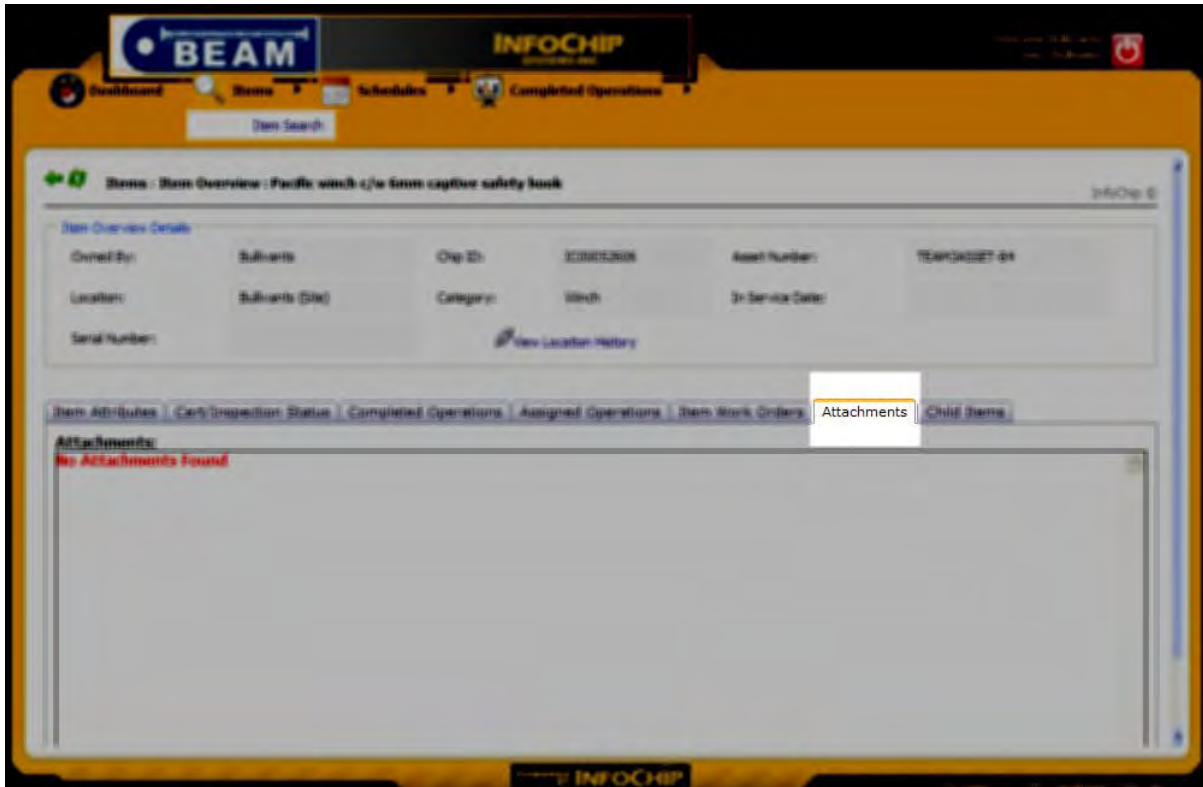

Item Overview

New: Additional data for items are presented in easy to use tab based format, displaying the data in the same window

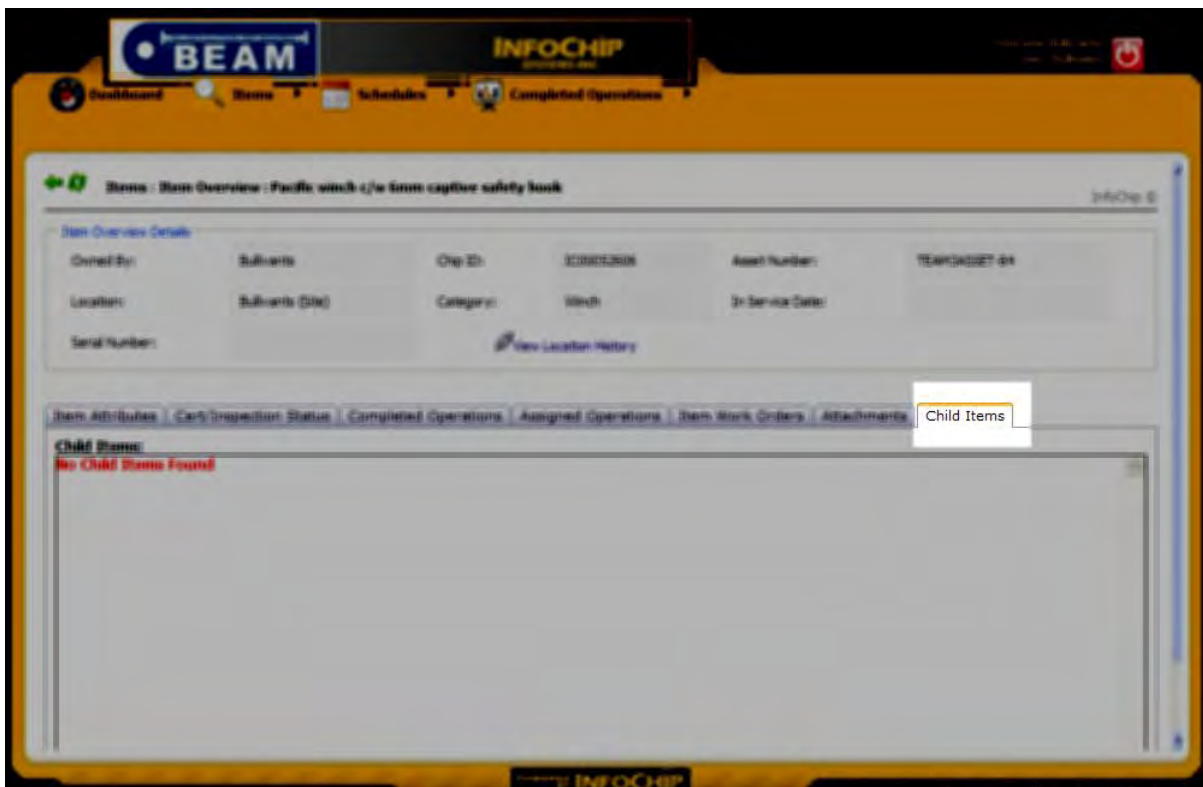

New: Attachments tab, allowing files to be attached to the item.

New: Child Items Tab

Child items are when you are linking for example a hoist to a crane. The hoist and the crane are separate items, but the hoist is a child of the crane, meaning potentially an inspection of the crane would force an inspection of the hoist as well. Or if you move the location of the crane, the location of the hoist moves with it automatically without you having to move the hoist separately.

## COMPLETED OPS:

New: Sort data onscreen by any column

New: Screen sort is now applied to selected report.

The screenshot shows the 'Completed Operations' screen in the INFOCHIP BEAM software. The interface includes a navigation bar with 'Dashboard', 'Items', 'Schedules', and 'Completed Operations'. Below the navigation bar is a search bar and a 'Completed Operations' section with various filter options. A table of completed operations is displayed below the filters.

Date (y/m/d)	Asset Number	Item Desc	Type	Operation Performed	Result	Alert	Performed By	Owner	Location Desc	Chipped Item	Attachments
Select 2009-01-05 05-04-05	12245	Wire Rope Single	Inspection	Wire Rope Sing Inspection	PASS	No	Employee 003	Subverts	Subverts (Site)	No	No Attachments
Select 2009-01-05 05-04-05	12245	Wire Rope Single	Inspection	Wire Rope Sing Inspection	PASS	No	Employee 003	Subverts	Subverts (Site)	No	No Attachments
Select 2009-01-05 05-04-07	12245	Wire Rope Single	Inspection	Wire Rope Sing Inspection	PASS	No	Employee 003	Subverts	Subverts (Site)	No	No Attachments
Select 2009-01-05 05-04-03	12245	Wire Rope Single	Inspection	Wire Rope Sing Inspection	PASS	No	Employee 003	Subverts	Subverts (Site)	No	No Attachments
Select 2008-11-27 05-04-07	0010140	Green Wire Rope Steel Tank	Inspection	Wire Rope Sing Inspection	PASS	No	James Lewis	Subverts	Subverts (Site)	No	No Attachments

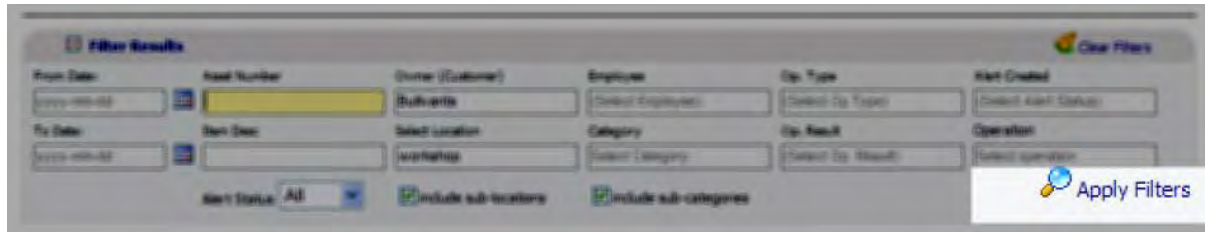

New Report based on Filters.

You can now apply filters to your data and then run a report based on filtered dataset

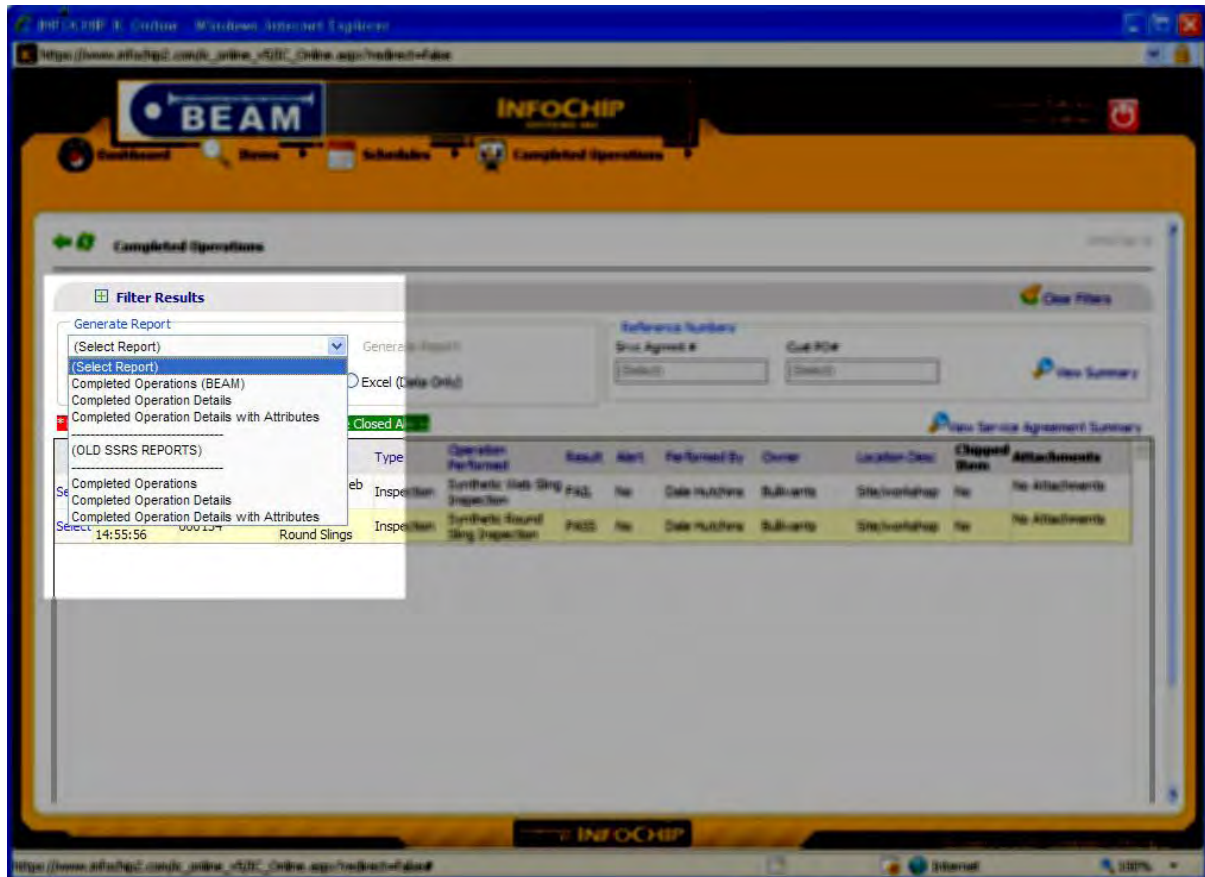

The screenshot shows the 'Completed Operations' screen in the INFOCHIP BEAM software with filters applied. The filters are set to 'Owner (Customer): Bullivants', 'Location: workshop', and 'Alert Status: All'. A report is generated based on these filters, showing a table of completed operations.

Date (y/m/d)	Asset Number	Item Desc	Type	Operation Performed	Result	Alert	Performed By	Owner	Location Desc	Chipped Item	Attachments
Select 2008-11-27 05-02-04	0010120	Synthetic Web Single	Inspection	Synthetic Web Sing Inspection	PASS	No	Dale Hutchins	Subverts	Site/workshop	No	No Attachments
Select 2008-11-27 04-05-06	000124	Synthetic Round Single	Inspection	Synthetic Round Sing Inspection	PASS	No	Dale Hutchins	Subverts	Site/workshop	No	No Attachments

You then click apply filter to filter your data

You can now run a number of reports based on the current filtered dataset.

New: Completed Operations Reports

Wollongong  
 5 Investigator Drive,  
 Unanderra NSW 2526
