

Open Body Hook & Hook Turnbuckles with Lock Nuts - Grade 316 - Stainless Steel

Main Features:

- Stub ends, hook & eye, eye & eye end fittings available
- Excellent corrosion resistance, especially in marine and coastal environments
- Ideal for saltwater, humid, and chemically exposed conditions
- Non-rusting material (corrosion resistance is inherent, not a coating)
- Suitable for outdoor and wet applications where longevity is required
- Used for light-duty tensioning and adjustment of cables, ropes, or wire
- Maintains clean appearance with a polished or brushed finish
- Low maintenance with long service life
- Resistant to pitting and crevice corrosion compared to lower-grade materials
- Commonly used in marine rigging, balustrades, fencing, and architectural setups (non-critical use)

Specifications:
