

The Bullivants ADAPTA® is an innovative adjustable synthetic lifting sling with easily adjustable legs. This sling provides significant improvements in safety, productivity and reduces the risk of manual handling injuries.

Features & Benefits:

- Available in 2 legs (use two slings for 4 leg configurations)
- WLL (SF 5:1) from 3.3 to 17t (other sizes available upon request)
- Manufactured with AmSteel® Blue Dyneema® Rope
- High strength to weight ratio
- Eye chafe protection cover against sharp edges
- Chafe cover for additional sling body protection
- Red heat shrink adjustment tails for identifying the adjuster grip area and protection of the tails
- Each Sling supplied with NATA certificate
- Complies with AS 18264
- 90% lighter than equivalent capacity alloy chain slings
- 85% lighter than equivalent capacity wire rope slings
- Torque free construction resulting in reduced risk of recoil in case of accidental breakage
- Faster change-outs for increased productivity
- Simple installation
- Easy ground level adjustment for uneven loads
- Reduction in storage space requirements compared to Chain Slings and Wire Rope Slings
- Lower cost of ownership
- Eye size is “matched” to the same capacity alloy chain sling
