BULLIVANTS INDIGENOUS SCHOLARSHIP PROGRAM

Bullivants is proud to announce and congratulate Darcy Wooden and Flynn Bailey in becoming our recipients of the Bullivants Indigenous Scholarship Program for 2023.

The scholarship grants each scholar \$10,000 per year for financial support. Funded by the sale of selected Bullivants Alloy Chain Slings, the scholarship program aims to encourage and support Indigenous tertiary students who have a passion for engineering to reach their career aspirations.

To qualify for this scholarship, all recipients must be an Aboriginal or Torres Strait Islander student studying full time towards an undergraduate degree in Engineering at an accredited Australian university.

Darcy, a proud Wiradjuri man, has just started his first year of his Bachelor of Engineering at the University of Wollongong. Darcy's love of Mathematics and the outdoors drew him to Engineering as a career.

“What really made me decide to pursue Engineering was my experiences watching the destruction of buildings and bridges in the 2019 bushfires that swept through Yuin Country. It really was the inspiration that sparked my interest in engineering.”

Darcy's future goals include working as an Engineer in communities to make an environmentally sustainable impact on country, building bridges, roads and other significant structures.

“For me to excel in Engineering and achieve my goals, I will have to study hard which will leave me with little time to work. This scholarship will help support me pay for living expenses and textbooks” says Darcy.

As a proud Noongar man, Flynn is in the second year of his Bachelor of Engineering (Honours)/Bachelor of Science at University of Western Australia. Flynn wishes to be an Engineer after he graduates and work his way to a leadership position while completing his MBA.

Flynn has worked as a trainee civil engineer at both South32 and Rio Tinto, gaining first-hand Engineering experience.

“This scholarship will provide financial relief for me and my family and will allow me to knuckle down on my studies and achieve the best results I can” says Flynn. “I hope it will help me to achieve my goal of becoming a leader”.

Bullivants

Throughout the year, our scholar recipients will be invited to their local Bullivants branch for a site visit, learn more about Bullivants and the Lifting and Rigging industry and meet the teams. They will also be invited to take part in our Inclusion and Diversity activities where they can share their story about their background and heritage.

Darcy and Flynn will be joining Hayden Wiggins who is in his second year of the program.

Hayden is currently in the 3rd year of his Bachelor of Engineering (Honours)/Bachelor of Arts degree at The University of Queensland. Hayden's degree will help him start a career he is passionate about - innovation in the electrical engineering field and improving the sustainability of the earth.

As Australia's oldest, largest, and most progressive specialist provider of rigging, lifting and height safety products and services, Bullivants would like to thank all their customers for purchasing quality lifting equipment and contributing directly to the Bullivants Indigenous Scholarship Program.

"I would like to congratulate Darcy and Flynn for being the successful recipients for 2023 and encourage them in their pursuit of engineering. I would also like to extend my support to Hayden as he continues his studies" says Trudi Chesterton, General Manager of Bullivants.
