BULLIVANTS ADAPTA WINS INNOVATION OF THE YEAR AWARD

In October, Bullivants attended the 2023 CICA Conference in Perth.

The Bullivants ADAPTA Adjustable HMPE Lifting Sling was nominated for the 2023 CICA Innovation of the Year Award. Presenting our submission to CICA delegates during the conference, Scott Gundry – National Strategic Sales & Corporate Support Manager, spoke about the safety, productivity and versatility benefits the ADAPTA offers.

We are proud and excited to announce that the Bullivants ADAPTA was the winner of the 2023 CICA Innovation of the Year Award!

The Bullivants ADAPTA has easily adjustable legs and provides significant improvements in safety, productivity – reducing the risk of manual handling injuries. Lightweight in comparison to other slings, the ADAPTA sling has no metal components, significantly reducing set up time.

During the conference days, CICA delegates visited the Bullivants stand where we showcased our ADAPTA and wire rope capabilities. During demonstrations, delegates also had the opportunity to operate the ADAPTA and easily adjust an uneven load.

Bullivants would like to thank everyone involved in organising the event.
